

RESEARCH AND DEVELOPMENT OF AN ONLINE INTERACTIVE ENCYCLOPEDIA ON THE MARINE LIFE OF MALDIVES FOR INNER MALDIVES COMPANY

Prepared by: Fathmath Aroosha Latheef

ABSTRACT

This project researches one of the best travel agencies of the Maldives, the Inner Maldives and aims to enhance their business by the development of a new system, an Online Interactive Encyclopedia on the Marine Life of Maldives. Even though one of the main attractions of the Maldives is the ocean and underwater life, information on Marine life of the Maldives is not readily available for the visitors of the Maldives. Due to this fast the visitors of Maldives faced the difficulty of planning their vacation to Maldives. This project comes with a detailed study on the Inner Maldives and the Marine Life of the Maldives. It sought solution for the lack of Marine life information for the visitors by developing an interactive encyclopedia that provides information to users of the different species that live in the Maldives waters, information on the coral reefs, seasonal change on the marine life, different dive spots in the Maldives. This project fundamentally aims to help visitors plan their vacation by providing the information they require on the underwater life in the Maldives. This encyclopedia would help visitors decide when to plan their vacation to Maldives and possibly where in Maldives to travel to. Aside from the tourists this encyclopedia would be beneficial to Divers, Researches, Student, Ministry of Tourism Maldives, Ministry of Fisheries Maldives and Ministry of Education Maldives which require information on the Marine life of the Maldives.
