

STUDY AND IMPLEMENTATION OF AN INFORMATION WEB PORTAL ON ENVIRONMENTAL DEGRADATION AND AWARENESS IN NIGERIA WITH E-COMMERCE SUPPORTED FEATURES

Prepared by: Khalipha Abubakar Nuhu

ABSTRACT

This project is on research and implementation of an Information Web Portal on Environmental Degradation and Awareness in Nigeria. A lot of issues on global warming and pollution are rising at a swift rate, and there is a need to reach out to people and enlighten them on how these issues can be reduced and in some cases totally prevented. This portal will provide information on how to prevent and handle these issues and also give people guidance on how to make the world greener. Through the release of articles and also books made available for online purchasing, a significant amount of information on environmental control can be spread at a very fast and convenient way. The author believes through the implementation of this system, and also the information it will provide, the public can be enlightened on environmental degradation, its effects and proper control measures, the general public will be more informed and knowledgeable on how to reduce global warming and environmental pollution, therefore looking forward to making the world a greener planet.
