

A PRODUCTION OF AN EDUTAINMENT APPLICATION ENTITLED ‘BOBBY AND FRIEND, THE ANIMAL KINGDOM EXPLORERS’

Prepared by: Nagavishalini Indran

ABSTRACT

I have decided to design an edutainment application called ‘Bobby and friend, The Animal Kingdom Explorers’ for pre-schoolers, it is suitable for children between the ages of 4-6 years old. This edutainment application is a short documentary on the different kinds of animals on the animal kingdom. Some simple games will be designed and included in the application, to make it more interesting. This edutainment application will benefit the children as they will have a better understanding on the different kinds of animals, their behaviors, the way they live and their habitats. The children will be able to learn about the animals even without visiting the zoo.
