

A STUDY AND DEVELOPMENT OF AN EDUTAINMENT APPLICATION TO TEACH SIMPLE ENGLISH GRAMMAR

Prepared by: Lydia Dominic

ABSTRACT

The purpose of this project is to develop a system to teach simple English grammar with the help of Adobe Flash. The system will include information on Tenses, Nouns and Verbs. This system can be used by children as well as people of any age who want to learn simple English grammar. The system explains everything in a simple manner so that the users can grasp them easily. Also it includes a tutorial which tests their skills. The area of study is to find out the scope and features as well as information on English grammar.
