A DEVELOPMENT OF AN INTERACTIVE MULTIMEDIA APPLICATION FOR PET LOVERS ENTITLED 'PET ZONE'

Prepared by: Suci Ilhami

ABSTRACT

This application is an interactive multimedia application which provides guidelines to the users who want to have pets. The target users for this application will be the kids aged 4 years old and above so that the user is acquainted with how to take care their pets. This application gives enlightenment on the pets' behaviors, the favorite activities of the pets, the pregnancy time, the healthy diet and the pets' age. This information will be investigated by the author from various resources.

This application is going to be a standalone system. The proposed features in this application will focus on the pets' information itself, a mini game, a storytelling, sing a long and pictures gallery of the pets which are incorporated with of different multimedia element such us 2D animation, graphics, image and sound to make the interaction more fun and attractive
