

A PRODUCTION OF A 3D VIDEO CLIP WITH SOUNDS SYNCHRONIZATION AND SPECIAL EFFECTS OF A SHORT STORY

Prepared by: Bie Lee

ABSTRACT

This project aims to create a music video clip of a story in using 3D with synchronization with the song. This project is to conduct an investigation and apply some of multimedia software features such as 3D software, sound effect, and video editing software features to create a complete music video clip. This music video clip will present the creativity of manipulating the video editing effects with the 3D model. Furthermore, selection of the tools and techniques for the project process will be investigated in the final production.
