STUDY AND IMPLEMENTATION OF INTERACTIVE CD-ROM ENTITLED 'VIRTUAL BEAUTY CONSULTANT' WITH 2D ANIMATION

Prepared by: Sim Swee Suan

ABSTRACT

The project aims to develop an Interactive CD-ROM Virtual Beauty Consultant to teach the youngster and ladies to take care of their skin and provides make-up tips. The application act as virtual beauty consultant, therefore it can provide proper information according to user's skin type, and recommend the tips on how to protect and repair problem skin. 2D graphics used to enhance the effect of the picture and flexibility. Interactive project can ease the user navigation work and provide high level of accessibility, thus, users can easily learn the skin care knowledge and make-up skill through the virtual application step by step.
