

NARROW RANGE THERMOMETER

Prepared by: Teo Sok Ping

ABSTRACT

This final report is written as to understand the nature of engineering design concept. However certain topics, including how to make PCB Board and how to operation, that not commonly found in our text book, is also discussed. Due to Nature o this report, detailed descriptive and explanation are available in the content pages. End results are given and are illustrated with detailed numerical examples. Furthermore the photographs a project construction serves to provided an idea about the competed construction.
