

# **A STUDY ON VARIOUS TYPE OF WIRELESS TECHNOLOGIES AND DEVELOP A PROTOTYPE OF STUDENT INFORMATION SYSTEM FOR INTI COLLEGE**

Prepared by: Wong Shaw Kit

## **ABSTRACT**

---

Wireless technology is one of today's most exciting innovations, bringing the power of communications, the Internet and the World Wide Web into the hands of users worldwide. Everyday, technological advancements provide new hardware, software and communication protocols. This project gives the opportunity to study on different kind of wireless communication technologies and further develop a prototype of student information system that allows student to view all the information of INTI College through the wireless internet access. Currently, INTI College is implementing INTIONLINE for students. In the future, INTI College may implement mobile INTIONLINE that allows lecturers to communicate with students at anywhere and anytime.
