

TO STUDY AND IMPLEMENTATION OF INTI EDUCATION BLOG (IEB) THROUGH WIRELESS NETWORK FOR INTI COLLEGE MALAYSIA ONLINE EDUCATION PURPOSE

Prepared by: Mao Lei

ABSTRACT

This project investigates the blog techniques and wireless network to implement INTI Education Blog (IEB) system. This education blog is used to help lecturers and student for education purpose. In IEB system, every registered user is going to be an author, an editor and bookman. Every users has a space in the server and it can be stored their information which include individual data and their articles, such as news, journal, disquisition and so on. Lecturers can post their articles to the Internet. The application can be accessed via wireless base network. Users only need to have a WIFI card in their computers to access the service.
