

# DEVELOPMENT OF INTRANET CHAT ROOM FOR BUSINESS ORGANIZATION WITH ENHANCED FEATURES

Prepared by: Helen Kok Li Yee

## ABSTRACT

---

This project is aimed to develop an Intranet Chat Room for business organizations communication in the LAN. The objective of developing Intranet Chat is to allow real time conversation. An Intranet Chat can cut down the time employees spend on routine communication tasks. This project addresses issues on studies of real time communication techniques within the employees in the organization. The scope of study covers the security of top management to handle various reports and documents. The enhancement of the existing Intranet chat room allows users to make document file transfer.
