

DEVELOPMENT OF A BROWSING TOOLS WITH ENHANCING PICTURE DOWNLOAD CAPABILITIES

Prepared by: Lim Wei Chuen

ABSTRACT

This project is researching on current web browser eg. Internet Explorer and Netscape Communicator. This project focus on those users who are often browses Internet and copy pictures/images file. Nowadays, most of the web browser didn't provide the features that can copy all pictures on web pages at a click of a mouse. So, development of this new web browser will be able to solve the problem. In addition, this browser can even copy link to other pages pictures. This web browser is develops using JAVA, HTML and C++. With this development, users that are lack of Internet knowledge will be able to surf Internet and copy the desire images or picture with efficient.
