

# INVESTIGATE AND DEVELOP A WAP-BASED CINEMA INFORMATION AND TICKET RESERVATION SYSTEM

Prepared by: Lam Pooi San

## ABSTRACT

---

The aim of this project is to explore and understand the concept of Wireless Application Protocol (WAP) technology and develop a WAP-Based cinema information and ticket reservation system. The project will include study on the WAP related technologies such as WML, WML Script, WAE, SDK, ASP etc. It will also develop a WAP-Based cinema application system that allows mobile users to have simpler and faster access to the latest movie information and services provided such as ticket reservation.
