STUDY AND DEVELOPMENT OF BARCODE APPLICATION AND PHOTO TAKING USING DIGITAL CAMERA TO GENERATE STUDENT ID CARD FOR INTI COLLEGE MALAYSIA

Prepared by: William Yong

ABSTRACT

This project will address on study of the usage of the digital camera in taking personal photo used for ID. This project will focus on the development of application of portrait acquisition. Its ultimate purpose is taking personal photo by using digital camera and cut the image to the standard photo size of ID. The portrait also can be edited and can add some effects to the capturing picture. This system also provides a barcode generator. A barcode does not change how the system operates, but it makes procedures faster and more accurate in order to gather information, which directly increases efficiency working procedure of INTI College Malaysia
