

# IMPLEMENTATION AND DEVELOPMENT OF ENHANCE PLUGIN FILTERS FOR GIMP

Prepared by: Wong Liang Shih

## ABSTRACT

---

In the current world, image is a way to express the meaningful of message to people. No matter in the entertainment, information technology, web page, advertisement, movies and so forth. In other words, in order to attract people, the interactive of image is very important. This depends on what kind of image manipulation program to use to render and apply effect the image. Graphical image program such as Adobe Photoshop, GIMP, MetaCreation Software and Macromedia Software have an important role to produce a graphical and interactive image, animation, movie and banner to the world. This project is to enhance a plug-in for the GIMP (GNU/General Image Manipulation Program) to give the user more usable effect to their image. The author is going to produce and try his best to enhance and design more plug-ins for GIMP.
