

# **AN IMPLEMENTATION OF AN ONLINE COLLEGE SPORT FACILITIES MANAGEMENT SYSTEM**

Prepared by: Ng Ruo Yun

## **ABSTRACT**

---

This project addressed issues on developing a web-based application that provide online sport facilities management system for INTI College by using .NET language. This system is not only implemented for student but also for staff. Student can book the sport facilities through online. Besides that, students can check free time slot for using the facilities. Students can give feedback on the sport facilities in INTI College. From time to time, the student can check any announcements made by the Student Affairs Office. In the web page, the descriptions of the sport facilities are available. Moreover, the training timetable of variables sport is displayed on a time table. The system also provides a web page for staff to access the booking information. In the staff web page, it provides new staff registration or particular changes of password for the staff. There are also functions for staff to record payment
