INTERACTIVE FILE TRANSFERRING MECHANISM AND MESSENGER SERVICE

Prepared by: Indukumar C.M.

ABSTRACT

The project helps to design and develop a messenger service system in JAVA. This system has some amount of reliability and will consider simple error cases regarding the transfer. It allows user to transfer file across different platforms, send online and offline messages and also e-mailing. This project implements client server for FTP using JAVA RMI. Client is with GUI front-end, allow client to view various features of messenger service including file transfer.
