

# INFORMATION EXCHANGE CHANNEL FOR STUDENTS AND LECTURERS OF SOCIT DEPARTMENT, INTI COLLEGE MALAYSIA

Prepared by: Tan Lek Hoon

## ABSTRACT

---

This project aims to develop an information exchange channel that enables more effective and efficiency communication among the students and lecturers of the SOCIT department, INTI College. This project will focus on developing a discussion forum and online bulletin board that enable the users to communicate with each other. The user student's profile will be listed and email notification will be generated. This project will also study the CGI (Common Gateway Interface) and ASP (Active Server Page) technology. There are both technologies that enable server side scripting. In this project, the author will conduct a list of activities to complete this project. This included project scheduling, preliminary investigation, system analysis, system design, system development and system evaluation. All will be listed detail in the content of this project.
