A STUDY AND IMPLEMENTATION OF A WEB-BASED INFORMATION SYSTEM FOR SUPER DRIVING SCHOOL, IMPROVED WITH MULTIMEDIA FEATURES

Prepared by: Low Mei Yun

ABSTRACT

This project aims to implement a web-based information system for Super Driving School, a driving school located in Taiping, Perak. In this project, the effectiveness of the existing system used by the organization would be reviewed to propose a new enhances system. By implementing the new system, new customers can register themselves as a new member, select and check on their driving test date, driving learning time and date through the Internet. Other than these functionalities, users can also obtain the information on the driving test rules and regulations, such as dress code and the registration procedures to under-going the driving test. Besides, this system will introduce this organization to the customers. This will help to promote the organization and hence attracts more customers. This system would be enhanced with video lessons of the pre-driving procedures, where users will be briefed on the demonstrations of the driving procedures.
