A STUDY AND IMPLEMENTATION OF DECISION SUPPORT SYSTEM FOR WEDDING PACKAGES ENHANCED WITH MULTIMEDIA FEATURES FOR THE BRIDAL SHOP

Prepared by: Lee Mun Sze

ABSTRACT

The purpose of this project is to help couples in planning their wedding ceremonies. Furthermore, this system will apply with multimedia features and decision support system. The picture of the wedding gown in each of the wedding packages will be display by front side and back side in order to give a brief idea how the wedding gown looks like. Then the decision support system will be helped the user to determine their more preferable packages to customize and buy. This system seeks to provide ways as well as idea for the married couple to organize the wedding ceremony by selecting the wedding packages.
