

AN IMPLEMENTATION OF A WEB-BASED CLUB EVENT ORGANIZING SYSTEM FOR STUDENT AFFAIRS OFFICE AT INTI COLLEGE MALAYSIA WITH DECISION SUPPORT SYSTEM FEATURES

Prepared by: Wei Li Qiong

ABSTRACT

This project was developed by the author for the officers of Student Affairs Office (SAO) at Inti College Malaysia (ICM) to reduce their effort for guiding the students to prepare their club events and help the students submit the event proposal, announce and advertise their events with web-based and decision support system (DSS) technologies. Based on the author's research, the author has found that the current club event organizing system is a manual system. To computerize the current system can improve the speed of dealing with club events.

The research was conducted by the author in order to help her in developing process of this project and to find more information about use needs and wants that can lead to successful project implementation.

The implementation of this project allows the SAO officer and the students to develop successful club events in the easy way.
