A WEB-BASED REMOTE OFFICE FOR SMALL OFFICE-HOME OFFICE USER

Prepared by: Tey Ching Chih

ABSTRACT

This project addresses the issues on small office-home office SOHO. It discusses on the nature and evolution of SOHO. This project further compares and contrasts traditional work style with SOHO from different perspectives. The project researches the impact of internet technology on SOHO and outlines the relationships between them. It comes with a web-based prototype that supports SOHO user to login to the company homepages, and enables them to sends documents to or retrieves document from server database.
