

# **A STUDY AND IMPLEMENTATION OF GEOGRAPHIC INFORMATION (GIS) FOR TOURISM SPOTS IN MALAYSIA**

Prepared by: Hon Sun Sun

## **ABSTRACT**

---

This project addresses issues on the development of Geographical Information System (GIS) for the various tourism spots in Malaysia. This project emphasis on the research is of GIS, which is capable of assembling, storing, manipulating, and displaying geographically referenced information according to the location of each state of Malaysia. Various tourism spots in Malaysia will be investigates and an effective and efficient Geographic Information System which will present the information gathered will be suggested. The project further describes the information and data of each state in Malaysia such as population, natural resources and so on. The user is able to get the information of tourism spots in Malaysia by specifying the map of Malaysia provided by system ad zoom in the tourism spot intensively. The information of each tourism spot Malaysia will be illustrated interactively. Eventually, this project aims to provide a well-dressed solution to present the information of tourism spots in Malaysia..
