A STUDY AND IMPLEMENTATION OF ONLINE PURCHASING MANAGEMENT INFORMATION SYSTEM (MIS) FOR SAMSUNG COMPANY

Prepared by: Tan Wei Song

ABSTRACT

The project aims to study and implement an online purchasing management information system for Samsung Company. Based on investigation, the author has found that Samsung Company provides electrical equipment for customer to purchase. Thus, the management information system is implemented with more features like easy access button to satisfy the users' needs and requirements. The management information system helps the company to record the customer information in an effective what. The system also will provide an easy access for customer/staff to access the information in the database. With the implementation of the management information system, customers can make orders and purchase on the internet with few clicking buttons instead of visiting several places to make orders.
