

A STUDY AND IMPLEMENTATION OF MULTI-FUNCTIONAL MANAGEMENT SYSTEM FOR TARITA PHOTO AV TRADING SDN. BHD. HEAD OFFICE AND CHAIN STORE

Prepared by: Zhao Gaofeng

ABSTRACT

This project was developed a Multi-functional Management System by the author for TARITA PHOTO AV TRADING SDN.BHD. in KUALA LUMPUR. The proposed system is web-based system, it help the managers to easy manage their head office and chain store.

The proposed system has 5 main part functions, which are “General Data”, “Purchase Management”, “Warehouse Management”, “Statistic Analysis” and “System Admin”. For the system users, there are three different level users in the proposed system, which are “Administrator”, “Chain Store Manager” and “Staff”; the different level users can use different function according to their authority.

The proposed system involves MIS function, it help manager general sales report and revenue report through the statistic analysis. Use the pie chart and bar chat easy for the manager view the report.

Finally, the author hopes his report would be useful for the juniors who want to develop similar project.
