

STUDY AND DEVELOPMENT OF AN E-MAGAZINE WITH INTEGRATION OF DISCUSSION BOARD AND ONLINE PHOTO GALLERY ON THE LATEST LAUNCH AND MODIFIED CARS FOR CAR FANATICS

Prepared by: Alvin Au Boon Hock

ABSTRACT

This project is to develop an e-magazine system. This system is categorized into 6 categories namely SCTuner Zine, Community, Multimedia, Calculator, Help & Support and Useful Links. For example, the SCTuner Zine will give articles on the latest cars, latest technology and feature news. As for the community, there will be a forum, which allows users to post and view messages in it. There will be also a quiz, which allows users to select the answer for the question and then show the number of correct answers and the total percentage. To get more interesting with the e-magazine system, the author had implemented video gallery, photo gallery and a 2D flash interactive car tuner. Apart from that, the author also implemented a road tax calculator system so that user doesn't need to scratch their heads over the total amount that they had to pay for their cars. Overall this system will able to let users to save time as there will be no more sharing of a copy of magazine as it is difficult to share a magazine in print form with someone who is elsewhere
