

# A VIDEO PRODUCTION SHOWCASING PLACES OF INTEREST IN MALACCA USING ADVANCED VIDEO EDITING WITH SPECIAL EFFECT

Prepared by: Chen Hoi Yhin

## ABSTRACT

---

The aim of this project is to study on advanced video editing techniques with special effects to produce a video clip introducing Malacca as a tourism place. Besides, this video clip will act as a guideline for tourists who want to visit to Malacca. By watching it, they will know where to go for entertainment, delicious cuisine, beach environment and which hotel to stay. For this project, the area of investigation is on video production editing techniques with special effects. In this video clip, there are few sessions to introduce which are the historical places around Malacca, the special and delicious cuisine, the beach environment, few hotels recommend to stay and also the entertainment place that can be found in Malacca. The whole video watching is supposed to be interesting and meaningful for tourist to gain knowledge, release tension and to understand more about Malacca in Malaysia. The video clip will take around 20 minutes for the whole process.
