A STUDY AND IMPLEMENTATION OF A KIOSK CAMPUS TOUR SYSTEM FOR INTI COLLEGE MALAYSIA

Prepared by: Joanna Kong Suit Lee

ABSTRACT

This project addresses issues on guiding and leading any new staffs, students, parents, or even visitors around the college. It focuses on the development and design of a virtual campus tour, which is developed and catered for any user within the college. The project sought solutions in helping those who are new and unfamiliar with the college surroundings. The project comes with the proper and effective guide that allows users to reach their destination such as different department in the college, laboratories, classrooms, lecture halls, etc without any difficulty. Ultimately, this project aims to solve visitor's problem without feeling helpless at INTI College throughout their studies here. This application involves all the multimedia elements including several video clips and a 360 degree panoramic view taken in the college.
