

# **A PRODUCTION OF A SHORT MOVIE ENTITLED ‘A MECHANICAL PENCIL CALLED JERRY’ BY COMBINING 3D ANIMATION WITH VIDEO SHOOTING**

Prepared by: Loh Hon Fui

## **ABSTRACT**

---

The aim of this project is to research on the techniques of combining 3D animation and video move. This project is short movie that is combines 3D animation with video shooting to represent the short story for a pen character. The movie will represent the video for the real world story and the 3D animation will be appearing when the movie goes into story for the 3D character. The environment for the 3D character is designed in 3D following the same background as in the video shooting. The movie will talk about a story of a pen and it communicates with other accessories.
