

“CRAZY BOOM” – AN ANIMATED ACTIONS MOVIE USING 2D AND 3D ANIMATION TECHNIQUES

Prepared by: Tan Wang Teck

ABSTRACT

This project is to produce an animated action movie using 2D and 3D animation techniques. The features of the project here is to study the different animation techniques on 2D and 3D. The storyline of the movie is about an agent, who worked with a government and his job is tried to eliminate all gangsters as fast as possible. During his mission there will be a lot of action stunts such as gun fighting and martial art scene. Some comedy scenes will be added into the movie. At the end of the project, readers will be able to understand how 2D and 3D animation techniques can be effective by used in producing action movies.
