

Pneumatic Safety Mat

Prepared by: Choi Wah Heng

ABSTRACT

This project paper is about the Pneumatic Safety Mat, it is useful in industrial application. This Safety mat is designed to avoid people from approaching the high speed machine. Example cutting machine, the Safety Mat system is essential to prohibit people from approaching the high speed machine. If any workers approach the machine and get injure, the management be blamed and the factory might be forced to operate by government authorities. Thus it will affect the profit of the company.
