

# STUDY INTO INTERIOR DECORATION WORK OF A RESTAURANT IN DAMANSARA

Prepared by: Lim Bo Jie

## ABSTRACT

---

Interior decoration is a kind of profession that applied creativity and technique within a building or space to achieve a suitable and functional built interior environment such as finishes, including paint, trim, wallpaper, flooring and fabric. The purpose of interior decoration is to benefit occupiers in the way in decoration of a space or building like increase aesthetic of a building or space. At the same time, living condition also will be increased.

In this project, study into interior decoration work in a restaurant is going to be carrying out and a cost plan will be prepared at the end of this period. My project title encompasses only interior decoration work and cost estimation. Interior decoration included internal finishes, lighting service, and air condition system and carpentry work. The internal finishes are included ceiling finishes, floor finish, and wall finishes. The lighting service is fitting lighting of the restaurant whereas air condition system is a temperature controller of the restaurant. Furthermore, carpentry works involve doors and column design. Besides, preliminaries and exterior works are excluded base on my project title.

Objective for this project report is to learn how the interior decorator done their job and costing involved in this project will be calculated in bill of quantity and cost analysis. The cost involved is given by the interior decorator that provided me information.

The renovation work can be divided to 7 elements that are walls finishes, ceiling finishes, floor finishes, lighting fitting, doors, ironmongery, air condition system, and carpentry work. These elements are proposed and installed in the restaurant. Moreover, in this report, these elements will be discussed.
