

# A STUDY INTO DESIGN OF LANDSCAPING WORKS TO INTI-IU “NEW ERA GARDEN”

Prepared by: Teo Wei Zhong

## ABSTRACT

---

The design of landscaping improvement work is to create an eco-friendly environment to the occupants especially the student in Inti International University. The designed area was 96m (length) x 57m (width) with total size of 1.35 acres land. Besides, the insert of soft and hard landscape is to provide relax and study area to the occupants. So, look into the types of soft and hard landscaping work and insert in my landscape improvement design is also one of the significant matters in this project. Then, understand the rules and regulation must be done before we carry out any landscape design. This is because we must understand the rules and regulation or guidelines first to provide healthier facilities to the occupants from our landscape design. Other than that, prepare costing and bills of quantities are quantity surveyor's job. Therefore, these have been prepared for an estimating purpose in this project.
