

PREPARATION OF BILL OF QUANTITIES AND COSTING ON THE SUPERSTRUCTURE WORK TO A DOUBLE STOREY SHOP LOT IN SEGAMAT, JOHOR, MALAYSIA

Prepared by: Shoo Woon Kian

ABSTRACT

The objective of this project is to study and do the research on how to prepare a Bill of Quantities of the superstructure for a double storey shop lot.

In this project I must able to study and understanding all the drawings, the actual drawings are very difficult to understand and read when it compressive all the section together. So we need to know how to read the drawings and provide the correct quantities and dimension to our Bill of Quantities.

In this project, the method of taking Bill of Quantities is based on SMM2 and the material unit price is based on latest CIDB Material Prices Report .
