

# BARBECUE OVEN WITH REVOLVING RODS

Prepared by: Stanley Yon

## ABSTRACT

---

In this project report, it contents of **FIVE** major parts which are the list of illustrations, steps of making a barbecue oven with revolving rods, and body of this report, Problem encountered, summary, conclusion of the project and references.

In the part of the list of illustration, diagrams will be shown and explained clearly in order to let the reader to know what the project is. The AutoCad Drawing of the project will be included in the part of list of illustration.

The body of the final project report is the most important thing throughout the report. It has been divided into several parts which are the introduction (explain about the project), definition about the project title, scope, objective of the investigation, desirable mold properties and characteristics.

The conclusion part is about the summary of the final project report and what have been done during the 13 weeks. There will be my opinion to improve the making a green sand mold for pulley included in the conclusion as well.

Lastly, the list of the reference (the reference are the websites that gave e information about my project and had been used to refer) will be shown at the behind of the project report.
