

RECONDITION PETROL ENGINE

Prepared by: Gan Boon Tatt

ABSTRACT

This project is all about reconditioning a 4-stroker internal; combustion petrol engine for a better performance. There are not many calculations in this project as the output power will be measured on dynamometer machine.

A step process along with pictures on the recondition of petrol engine will be shown I this project as well. Some diagrams and graphs are attached to give a better information and understanding of the project.
