

# HIGHWAY INTELLIGENT SIGNBOARD

Prepared by: Chua Han Loong, Lee Jun Tel, Ngui Eng Chai, Wong Keng Huang

## ABSTRACT

---

Road accident has been on the rise on our Malaysian highway. A lot of effort has been done to reduce this phenomenon, such as OPS sikap done by the Polis Diraja Malaysia regularly. But sadly the number of accident has not decreased and yet increased. This let to various parties searching for method to curb this problem. That is where our project comes in.

The aim of this project is built an intelligent signboard suited for the use on highways. The use of this system is to monitor the speed of vehicles. It then will relay the information to the driver on the signboard. In case the vehicle is speeding, it will give the driver warning of this speed. Other than that the signboard system is also equipped to help police to conduct roadblock
