

WIRED CONTROLLED SUBMARINE AND HARBOR

Prepared by: Tony Ting Shee Teik, Koh Whye Keong, Yong Mun Jun, Ang Wie

ABSTRACT

The definition of a submarine given in dictionaries refers to a ship/warship that can stay under water. In general, the assumption of the public of a submarine is a weapon of war. As a matter of fact, this assumption is not entirely correct. Although it is true that submarines were used commonly in war, the usage of this machinery has revolved. Today, its main function is to exercise under water researches. Marine life can be analyzed with this modern facility.

Further on in this report, the mechanism of the submarine will be explained minutely. The steps taken to construct it will also be displayed.
