

PROJECT OF PHYSICAL MODEL ABOUT DOUBLE-STOREY DETACHED HOUSE

Prepared by: Pan Kek Yoon

ABSTRACT

An attractive 4 bedroom double-storey detached house. The design land-area is 4,900 sq.ft and planning the built-up area is 2,400 sq.ft. Some double of four face glazing and alarm system. 17' kitchen, 3 bedrooms to the first floor include one larger master-bedroom and bathroom with shower and separate WC (means having a low level suit with half ceramic wall tiling with border relief). Permanent staircase to attic bedroom with dormer window. Driveway for 4 cars, garden and double detached garage with power and lights. Outside there are attractive gardens to the front and rear with lawns, flower beds, borders and mature shrubs and trees.
