

DESIGN OF A 1 1/2 STOREY SHOP LOT

Prepared by: Sia Cheh Meng

ABSTRACT

The title of this project that I have chosen a one and a half storey shop lot. The main objective of this project is to implicate all of the knowledge that I have learn over the periods of two years by taking Diploma in Civil Engineering course through presentation of theory and applications of BS 8110. The structures of this shop lot is designed for the ultimate limit states and checked for the serviceability limit states design. I am sure that after I finished this project, it would provide me a more understanding on how this courses fit into my areas.
