

# HUMAN WASTE DISPOSAL SYSTEM

Prepared by: Han Wee Leong

## ABSTRACT

---

Project for Engineering Student is one of the main 24 subjects that have to be completed by each student who is taking Diploma In Engineering course. As a Civil Engineering student, I have to do a project, together with a detailed report, for this whole semester (6<sup>th</sup> Semester).

The title of my project is **Designing A hand Flush Human Waste Disposal System for 20 People**. The title of my project, I have come across an amount of references books, which have a detailed explanation about the sewage system. All these reference books can be found in Engineering Library at University of Malaya, Kuala Lumpur.

We are given a duration time of 13 weeks to do this project and hand up a detailed report by week-15. Besides, we also have to do two presentations, which is **Oral Presentation** and **Poster Presentation** at Week-8 and Week-15.
