

DESIGN AND PLANNING COMMUNITY CENTRE

Prepared by: Yong Yean Chong

ABSTRACT

This project is basically design to tell us about a rough idea off designing and planning of a community centre. Community is a place for people to do some gathering. People can have some performance or dinner in it. They also can do some reading, exercises, and do some research in the library in the community centre.

The community that I designed is not a big one. It's just a small size of community centre that allows people to do some beneficial things inside. It consists of a hall at the ground floor for people to do some performance, exercise and has dinner there. Besides, there are also a library, 2 restrooms, 2 conference rooms, 2 auditoriums and a gymnasium centre in the first floor. People can have a meeting in this community centre, having a lecture, or do some study or reading in this building whenever they are free for nothing. Want to know more about how I the design this type of community centre?? Turn to the next page and do check it out.
