

PROPOSE 2ND ENTRANCE TO ICM

Prepared by: Lee Yew Joo

ABSTRACT

This project is about the outlining of the weaknesses of the road access to ICM (INTI College Malaysia), and hence to propose another entrance to improve traffic situation. All designation in this project is based on JKR standard (Arahan Teknik). The designed entrance is actually a left turning intersection from the main road (from DESA MELATI) to connect the existing road in ICM. Appropriate analysis and drawing was done to illustrate the designation in each section.
