

# **DISCUSS THE CHOICE OF SEWER PIPES IN CIVIL ENGINEERING CONSTRUCTION**

Prepared by: Tan See Wei

## **ABSTRACT**

---

The main purpose of this project is to understand the various materials used for sewers and analyze the different conditions that allow for usage of the materials. The purpose is to know in depth on the materials' characteristics so that the correct choice will be made during construction.

In my report I have discussed on the different types of materials and how they are connected. I have provided the method of designing sewer as well. There is also an example teaching on how to use the given formula and graph.
