

STUDY ON THE USE OF PREFABRICATED STEEL FORMWORK FOR CONSTRUCTIONS

Prepared by: Chew Hon Guan

ABSTRACT

First and foremost, I would like to summarize the content of this report. The following pages of the report will include the structure of the prefabricated steel formwork used, the design details, the comparison of advantages/disadvantages between the usages of prefabricated steel formwork and the wood formwork used widely in Malaysia and also compare the material used such as concrete wall with brick wall.
