

# DESIGN OF REINFORCED CONCRETE PEDESTRIAN BRIDGE FROM ACADEMIC BLOCK TO THE STUDENT CENTER

Prepared by: Wong Sze Tech

## ABSTRACT

---

The aim of the project paper is clear explanation about the overall of the project. This project paper is mainly about the briefing of the project from beginning to the end. When proceed to design phase many things needs to take into consideration. Besides that, it required of overview of method to complete this project.

**These are several things that we need to take into consideration:-**

- Objective of the project
- Definition of the bridge
- Analysis of the structures
- Method of design
- Advantages of reinforced concrete structure
