

USE OF INFORMATION TECHNOLOGY IN MONITORING CONSTRUCTION PROGRESS OF LOW-RISE BUILDINGS

Prepared by: Lim Hwa Kian

ABSTRACT

This is a project about how to use information technology to monitor a construction progress of a low-rise building. I am using the principles of information technology, thus you can use information technology to monitor even larger constructions like construction of airports, shopping complexes and etc. in Malaysia, nobody has use IT on monitoring, so now I am trying whether it is nice for us to use IT in construction industry or not.
