

# **A PROPOSAL & DESIGN OF A SKATE PARK FOR INTI COLLEGE MALAYSIA**

Prepared by: Mohd Aminudin Bin Abd. Jaffear

## **ABSTRACT**

---

As stated in the title of this project, which is 'A Proposal & Design of a Skate Park for Inti College Malaysia', readers can briefly know what this project is all about and that is a skate park proposal and design.

The main idea of this skate park proposal for Inti College Malaysia is simple, that is to give a proper place for students of this college to play with their skateboard in a proper manner as well as having fun with their friends.

This skate park is made of a steel structure and was designed by referring to the 'BS 5950' design code. This skate park was also designed not only restricted to skaters but also open to bikers and rollerblades.
