

A STUDY OF THE PROJECT MANAGEMENT SYSTEM IN MALDIVES

Prepared by: Fathimath Shaana Farooq

ABSTRACT

The specific requirement of this project is to analyze the Maldivian project management system for construction projects. The study consists of an introduction to the system and focuses mainly on the implementation of project management for construction works in Maldives. A study of the Malaysian project management system was done in general. This study was used to identify the strength and weakness that exist within the Maldivian project management system. The outcomes were used to recommend the solutions to improve the system further more.
