

# INFRARED OBJECT COUNTER

Prepared by: Lee Hsee Wei

## ABSTRACT

---

This final report contains many part of the description of my title project: - 'Infrared Object Counter'.

First of all, we are dealing with the circuit diagram and components that required in this project. This will let the leaders know what's the component, which will be used in this project. Follow by the block diagram that explains how's the circuit function and of course I will explain of each part of the component in detail., we also will analysis the whole circuit and discuss the theory that need t apply on this project.

Lastly, I will enclose this report with the conclusion, bibliography, and appendix.
